Education

Vellore Institute of Technology, Amravati , Andra Pradesh

June 2020 – July 2024

B.TECH Computer Science

GPA: 8.8

Ramakrishna Mission Vidyalaya, Agartala, Tripura

April 2018 – April 2020

All India Senior School Certificate Examination Science

GPA: 89 %

Ramakrishna Mission Vidyalaya, Agartala, Tripura

April 2009 - April 2018

All India Senior School Certificate Examination Science

GPA: 89 %

Experience

Chubb

June 2024 – Present

Software Engineer

Hyderabad, India

- Engineered scalable microservices and APIs leveraging Java Spring Boot and .NET Core, enabling seamless integration across enterprise platforms and improving system performance.
- Designed and optimized relational database schemas (RDBMS) for high-volume identity and access management workflows, improving query efficiency and ensuring data integrity.
- Built event-driven solutions by integrating Apache Kafka for reliable message streaming between identity services and monitoring systems.
- Developed an AI-driven error management agent that detects error codes, analyzes root causes, and triggers automated remediation workflows—improving resilience and reducing manual troubleshooting.
- Deployed microservices and wrapper APIs to AWS (EC2, RDS, Lambda, S3) using CI/CD pipelines, achieving global scalability and reduced deployment time.
- Automated operational tasks with PowerShell scripting and Azure Functions, reducing manual workload and minimizing errors.
- Applied strong data structures and algorithms (DSA) knowledge to optimize backend services, reducing API latency and enhancing system throughput.

Chubb

September 2023 – May 2024

Technology Intern

Hyderabad, India

- Designed and developed a full-stack inventory management system using Java Spring Boot (backend) and Angular (frontend), integrated with an RDBMS backend to provide real-time updates and analytics dashboards.
- Implemented authentication and authorization flows, optimized SQL queries, and deployed the solution on AWS cloud services for scalability and reliability.

IIT Kharagpur

June 2022 – August 2022

Software Development Intern

Kharagpur, West Bengal

- Engineered a FHIR (Fast Healthcare Interoperability Resources) module on an open-source, web-based system, improving data exchange efficiency and interoperability by 25%.
- Optimized backend systems by mastering SQL and API integration, significantly enhancing data management processes.
- Developed backend applications using Java Spring Boot, increasing system reliability by 20% and streamlining performance.

Technical Skills

Programming Languages: Java, C++, SQL, MySQL, Data Structures and Algorithms (DSA)

Frameworks & Tools: Spring Boot, .NET Core, Node.js, React.js, Angular

Cloud Platforms: AWS (EC2, RDS, Lambda, S3), Azure

Databases: RDBMS (MySQL, PostgreSQL), MongoDB

Messaging & Streaming: Apache Kafka

AI & ML: Machine Learning, Deep Learning, Natural Language Processing, TensorFlow

App Development: Flutter, SwiftUI, Figma

Data Visualization: Tableau

Projects

Bank Management System | *Java, Spring Boot, MySQL, AWS*

Dec 2022 – Feb 2023

- Developed a banking application using Spring Boot with RESTful APIs to manage customer accounts, transactions, and loan processing.
- Designed and normalized relational database schemas in MySQL for efficient transaction handling and data integrity.
- Integrated authentication and authorization workflows ensuring secure user access.
- Deployed the application on AWS (EC2 and RDS), ensuring scalability and high availability.

Threads | *ReactJs, NodeJs, MongoDB, ExpressJs*

July–Aug 2023

- Enabled real-time updates and notifications, enhancing user interactivity and engagement.
- Implemented secure user registration and login features, safeguarding user data and ensuring data integrity.
- Utilized React hooks and context for efficient state management, ensuring a smooth user experience.

Schizophrenia Detection using EEG Signals | *Deep Learning, OpenCV, GCNN*

Jan–July 2023

- Evaluated VGG16, CNN, LSTM, and VAE models, achieving a 95% accuracy rate with the VAE model.
- Enhanced the analysis process by transforming EEG records into spectrogram conversions, improving data processing speed by 30%.

Certifications

- [Fundamentals of Accelerated Computing with CUDA Python](#)
- [Fundamentals of Accelerated Computing with CUDA C/C++](#)

Achievements

RESEARCH PUBLICATION : Presented and published the paper “Spectral and Graph-Based Deep Learning Models for Schizophrenia Detection” at the 2023 International Conference on Emerging Research in Computational Science (ICERCS). Explore the details here: <https://lnkd.in/dwsUPW6D>.

HIGH PERFORMANCE COMPUTING ”NVIDIA”: Clinched 1st position in One Week National Online Workshop - CODETHON 2022 on “HIGH PERFORMANCE COMPUTING”.
